SKILLS

- Machine Learning
- Problem Solving
- Manual Testing
- SQL
- Data Structures and Algorithms
- Java
- Python
- Data science
- AWS
- UI/UX Design

LANGUAGES

- English (Fluent)
- Hindi (Fluent)
- Telugu (Fluent)
- French (intermediate)

ACHEIVEMENTS

- Certification in Machine Learning
- Certification in Data Science using python
- 5 stars in SQL, Java, C++
- Manual Testing Badge
- Certified System and Senior System Architect in Pega
- Azure Certification

PROFILE

A flexible Electronics and Communication Engineer skilled in Python, Java, SQL, and C++. Experienced in manual testing and machine learning, with strong analytical and problem-solving abilities. Committed to learning and innovation, with a proven track record in teamwork, communication, and project success through attention to detail and strategic thinking.

PROJECTS

Automatic Irrigation System Using IOT

Main project

- We had developed an irrigation system using IOT, where it auto regulates the watering to plants with the temperature and the basis of moisture.

Medical Application Using Pega

Technical Project

- We had developed a medical receptionist application using the tool called Pega. Where we had developed a user-friendly application.

Banking Application Using Pega

Technical Project

- We had developed a banking application using the tool called Pega. Where we had developed a user-friendly application. With the active loan and tenure calculation with the operating values of the Banks.

Customer Segmentation using Unsupervised Machine Learning in

Python

Technical Project

- Developed the segmentation of customers on the basis of their similar characteristics, behavior, and needs.

Phonebook Application using CPP.

Programming Project

- Phonebook Application is made for storing and organizing contact information for people and businesses.

Mars Sensor Project For Nasa (Nasa Hackathon project)
