Projects Experience

ERP

- Catering specifically to mid-sized enterprises, with a focus on **optimizing Human Resources Management (HRM)** modules. The overarching goal is to **streamline and automate various HR processes**, ultimately enhancing operational efficiency and facilitating strategic decision-making within the organization.

FreshPack

- An ecommerce platform specializing in packaging products, catering to businesses' diverse needs for high-quality packaging materials.

2Stay

- is a comprehensive web application designed to simplify and streamline the accommodation booking process for international students planning to pursue their studies in Australia. This platform facilitates a smooth interaction between students seeking accommodation and authorized agents responsible for requesting accommodations on their behalf.

NidhiSoft

- NidhiSoft is an application designed exclusively for Nidhi companies. It serves a dual purpose: creation and management of Know Your Customer (KYC) data while providing a robust platform for tracking data associated with a range of financial products, including gold loans, personal loans, fixed deposits, and recurring deposits.
