SUMMARY

Experienced software engineer with a proven track record of 1 year in the industry, backed by an additional 1.8 year of internship experience. Proficient in both backend and frontend development, I've contributed to diverse projects across domains including Cloud Management, Logistics, Entertainment, Healthcare, and E-commerce. My expertise extends beyond conventional frameworks, with active participation in creating custom frameworks and web server designs. I thrive on challenges, leveraging strong skills in data structures and algorithms to deliver robust solutions. Passionate about innovation, I continuously seek opportunities to enhance user experiences through cutting-edge technology.

EXPERIENCE

Software Engineer | Fullstack Developer

Adixoo Private Limited

08/2021 Indore

Started as an Intern, progressed to Associate Software Engineer, and eventually served as a Team Lead. - Worked on diverse projects spanning logistics, entertainment, cloud services, eCommerce, and more. - Handled both frontend and backend development tasks. - Utilized technologies and tools including C, JavaScript, TypeScript, Node.js, React.js, Angular, Java, SQL, Oracle, MongoDB, PostgreSQL, Unit Testing, Jest, Git, and Jira. - Successfully completed over 10+ projects. Played a pivotal role in enhancing client satisfaction. - Demonstrated strong teamwork and collaboration skills.

SKILLS

Fundamentals

Algorithms Data Structures

Languages & Frameworks

C Angular React.js Node.js Express.js Nest.js Next.js JQuery React Native

GraphQL Jest Java Javascript Typescript C++ Spring Boot

Databases

MySQL OracleDB Postgres MongoDB MariaDB DynamoDB

PROJECTS

Nike

https://atonce-stg.nike.net/

Key contributor at Nike as a Fullstack Developer, specializing in frontend and backend development. Led the design and integration efforts for the Order Confirmation Section of the Nike app. Designed user-friendly interfaces and integrated APIs to enhance the user experience. Developed a robust Confirmation Notification service on the backend for seamless communication with users.

Tools/Technologies: Node.js, React.js, Angular.js, AWS Lambda, Jest, Github

PROJECTS

Emaar

🔗 https://play.google.com/store/apps/details?id=com.emaartechnologies.emaarone&pcampaignid=web_share

Developed a user-friendly interface and interactive components for a platform facilitating the buying and renting of houses in Middle East countries. The project aimed to streamline the property search process and enhance user experience.

Tools/Technologies: React.js, Redux, React Native, Jest, Figma, Github

Primerica

🔗 <https://www.primerica.com/>

Developed the Contact Module as part of the Primerica Project, a comprehensive platform offering insurance, investment, and financial services. The Contact Module facilitates user registration and access management, ensuring seamless interaction between users and the portal.

Tools/Technologies: Node.js, Redux, Nest.js, Jest, Jenkins, Github.

Ametnes

🔗 <https://cloud.ametnes.com/>

As a full stack developer for the Amtnes project, played a pivotal role in designing and implementing a comprehensive cloud services platform. Leveraging React for frontend development and Express.js for the Backend for Frontend (BFF) layer, spearheaded the development of a user-friendly interface for accessing server resources, storage, and various other services offered by the platform.

Tools/Technologies: React.js, Redux, Express.js, Jest, Gitlab.

Crowdbotics

🔗 <https://move2vendor.com/>

As a Frontend Developer at Crowdbotics, played a crucial role in the development of an innovative automobile parts selling app. Responsible for managing both user and vendor interfaces, integrated UI components to create a seamless dashboard experience. This included developing modules for branding, order management, bidding, quotation handling, and more. By ensuring a user-friendly and intuitive interface, contributed to enhancing the platform's functionality and facilitating smooth interactions between users and vendors.

Tools/Technologies: React.js, Redux, Jest, Github.

EDUCATION

B.Tech Computer Engineering

Indore Institute Of Science And Technology

📅 03/2019 - 03/2023 📍 Indore Madhya Pradesh

GPA

8.0 / 10.0

ACHIEVEMENTS

Received Employee of the Year Award for exceptional performance.

Led cross-functional teams on projects, achieving a significant improvement in project completion time.
